

SLAB SOFFIT

WATERPROOFING TO SLAB SOFFIT SPECIFICATION

1. General:

- 1.1. The **ACTFLEX 988 CWP** waterproofing system shall be applied to the slab soffit before the installation of aluminium windows and sliding doors.
- 1.2. The slab surface must be prepared, cleaned, and free from any loose debris, oil, or contaminants before the application of the waterproofing membrane.

2. Application Procedure:

- 3.1. The **ACTFLEX 988 CWP** waterproofing system shall be applied in two coats, with each coat having a thickness of 400 microns (0.4mm).
- 3.2. The first coat shall be applied directly to the prepared and cleaned slab soffit surface.
- 3.3. The first coat shall be evenly spread using a suitable brush, roller, or spray application method, ensuring complete coverage over the designated area.
- 3.4. After the application of the first coat, allow a drying time of 4-6 hours @ 25°C and 50% R.H, ensuring it is fully dry before proceeding.
- 3.5. The second coat shall be applied on top of the first coat, following the same application procedure and thickness.
- 3.6. After the application of the second coat, allow a drying time of 24 hours @ 25°C and 50% R.H, ensuring it is fully cured and dry before further construction activities.

Always consult with a Actech Protective Coatings Representative for regulations specific to your wet areas, as they may have additional requirements for waterproofing projects.
